iCore360[®] Intuitive Banking

Your core, focused on your success.

In today's market, you have to do more with less, faster, and for more customers than ever before. And, have the flexibility to change at a moment's notice. You need a core solution that is intuitive, dynamic, and adaptable. You need iCore360[®].

Integrated and Intuitive

iCore360 is an award-winning, web-based solution for complete bank management, built around a single relational source of information and integration that makes you more efficient, competitive, and profitable. In-house or outsourced, iCore360 integrates your entire bank with authentic business intelligence – including complete mastery of your entire customer relationship and data across all channels – from a single data source.

Architecture

iCore360 is built from the ground up with the most advanced, trusted and adaptable technology available, including Microsoft .Net and Oracle, not just a window-dressing on older technology.

iCore360 runs on a standard internet browser, and maximizes the latest development standards for cost-effective adaptability, that keeps you up to date and ahead of the competition.

Efficiency

iCore 360 seamlessly integrates your bank from the teller line to the back room and beyond, with direct access to all of your bank's data from one source, including entire customer relationships, profitability, documents, images and more.

iCore 360 also helps you automate tasks, create customized individual workflows and eliminate redundancies to work more efficiently and improve customer service.

iCore360 **Highlights**

- .NET web-enabled architecture
- Single source relational database
- Streamlined, immediate disaster recovery
- No client workstation installations or maintenance
