DCI Wins 2015 *BankNews* Innovative Solutions Award

- Bank technology developer takes top honors in national vote by community bankers -

HUTCHINSON, KAN., November 24, 2015 – DCI, developer of the award-winning iCore360® core banking software and related technologies for community banks, has been named a winner of the 2015 *BankNews* Innovative Solutions Award.

The Innovative Solutions Awards are presented each year by *BankNews* Media to recognize companies that have introduced or significantly enhanced products designed to help community banks become more efficient, expand their capabilities and, ultimately, better serve their customers. More than 40 companies competed for awards in four different categories, with winners determined by votes submitted from *BankNews* readers.

This is the third time that DCI has won the *BankNews* award and this year DCI was honored for its Internet and mobile ebanking solutions that are quickly gaining popularity among community bankers for their notably high value and performance among industry competitors.

DCI was also named first runner up in the Management/Operations/Processing Solutions category for its iCore360° core banking software, which previously won the top award honors in 2008 and 2011.

Unique in the bank tech industry, DCI has remained privately owned by several client shareholders for over 52 years, with customers serving as board members and user group leaders who are actively involved in the development of the company's technologies. The collaboration DCI shares with its customers has earned the company a loyal following and distinguished reputation for personal service in the industry.

John Jones, DCI President and CEO said, "We are particularly proud of this award as evidence that community bankers prefer our unique combination of performance, value and one-on-one relationships we create with them."

The award is the latest in a series of recognitions for DCI this year. DCI was also named a 2015 FinTech Forward Top 100 Technology Provider by *American Banker* and BAI, and was named the exclusive core technology provider endorsed by the California Bankers Association.

About DCI

DCI is the developer of the award-winning iCore360® core banking software and related technologies for community banks nationwide. DCI is privately owned by a group of bank clients, with several clients serving as board members and user group leaders. In addition to iCore360® (available hosted or in-house), DCI offers integrated solutions for Internet and mobile banking, private ATM network and card management, teller automation, remote capture, custom analysis, risk/vendor management, managed IT and more. DCI was named a 2015 FinTech Forward Top 100 Technology Provider by *American Banker* and BAI, winner of the 2015 *BankNews* Innovative Solutions Award and the exclusive core processing solution endorsed by the California Bankers Association.
