

Corporate Capture21™

The Easier Merchant Capture Solution

Give Businesses Another Reason To Love You With Corporate Capture21 Remote Deposit

Your business customers know that time is money, and now you can help them save both. Corporate Capture21 (CC21) makes it faster, easier and more economical for businesses to make accurately balanced imaged deposits directly from their business location with features you won't find anywhere else.

Easy and Economical

Because CC21 is web-based, it is less expensive and setup is a snap, with no complicated software to install or maintain. The point-and-click workflow couldn't be easier to use, and CC21 is compatible with today's best compact scanners, including current Panini, Digital Check and Canon Models.

Flexible and Secure

CC21 also ensures the utmost security for both you and your customers, with duplicate detection and unique multi-factor authentication security layers, including encrypted PIN numbers exchanged through mobile device calls. Plus, deposit images are automatically converted to industry-standard X9 format and securely filed for quick access.

With CC21, you have complete control over deposit parameters like frequency, number of checks, maximum amounts, standard vs. virtual deposit tickets, user-level security (both bank and customer staff) and more. You can also customize CC21 to display your bank's logo, web links and unique messages when users log in.
