

iCore360[®] Analytics

Custom Reporting and Analysis

Customized Reporting for a Revealing Look at New Opportunities

iCore360 Analytics gives you advanced tools for accessing and reporting on any piece of your bank's data to track and gain insight into your customer profitability, product success, marketing opportunities and more.

Intelligent Design

With a results-oriented approach and the freedom to create, Analytics helps you quickly set up your own reports and find fast answers to important business questions.

Analytics provides the architecture to generate and organize presentations, charts, reports, customer profitability tracking, and personalized dashboards, giving you access to custom information and targeted data. Analytics also lets you access and present your data using familiar banking terminology, structures and functional areas.

The Analytics interface is designed to let you easily surf through information to quickly uncover trends or problems without the restrictions of a preset path.

Intelligent Dashboards

Analytics provides any employee with intuitive, interactive access to information that is actionable and dynamically personalized based on their individual role and identity. Working with live reports, prompts, charts, tables, pivot tables, graphics, and tickers, your bankers have full capability to drill, navigate, modify, aggregate and interact with data results from a wide variety of sources.

Analytics also automates simple, repetitive tasks and reports, and comes with a collection of preformatted, customizable templates for management reports, mailing labels, and more. You can also create new templates on the fly, with picklists and prompts that make reporting easy and flexible for everyone.

Core technology you can depend on . . . a relationship you can trust.

Intelligent Answers

Analytics provides true end-user ad hoc capabilities in a pure Web architecture. Users interact with a logical view of information to easily create charts, pivot tables, reports, and visually appealing dashboards, all of which are fully interactive, drillable and can be saved, shared, modified, formatted, or embedded in your personalized Dashboards. The results are new levels of user self-sufficiency and insight in an environment that is fully secure.

Intelligent Publishing

Analytics provides a centralized architecture to easily generate and securely deliver custom information to employees, customers, and business partners in the most user-friendly format, including Microsoft Word or Adobe Acrobat, even from multiple data sources.

Analytic Highlights

- Preformatted templates
- Meaningful reporting for customer profitability, product effectiveness, and more
- Marketing and householding opportunities
- Exports to standard office software
- Organized catalog of application-specific data (loans, deposits)
- Reporting across applications (loans, deposits, etc.)
- Advanced filtering with detailed prompts, expressions
- Flexible sorting, grouping, totaling options
- Custom report layout controls (fonts, columns, more)
- Separately priced options for authoring and view-only user roles

Combined with ease of use, low cost, increased productivity and minimal technical involvement it all adds up to helping you get a higher return on your investment.

Call us today and discover more meaningful uses for your bank's information.
