

# Proof21™

Teller Item Imaging, Capture and Balancing Solution

## Fast, Accurate, Integrated Capture and Proof at the Teller Line.

Fraud, regulations and costs for traditional item processing are at all-time highs. Now more than ever, you need an end-to-end imaging solution that is simple, affordable and reliable.

Proof21™ gives you complete paperless imaging and end-to-end clearing, combined with accurate proof and balance functions in a single workflow directly from your teller line, and is fully integrated into DCI Teller™ and iCore360®. And the whole process couldn't be simpler.

### How It Works

As transactions are received, your tellers simply drop checks into a miniature scanner, verify the scan, confirm the pre-filled data on the screen and the transaction is immediately processed and proven. Proof21 also updates iCore360 with images as transactions occur or at the end of day for posting and easy online viewing and archival.

When required, virtual tickets are automatically created and even multi-check transactions are processed quickly and accurately — all with just a few clicks and keystrokes.

### Profitable Efficiency

Proof21 not only captures your check images at the teller line, but it also serves as a front counter proof solution, eliminating the handling of paper checks, back office operations and courier charges.

From the front office to the back office Proof21 provides tangible benefits with a noticeable return on investment. Proof21 speeds your collection process and helps identify potential fraud. And because your deposits to the Federal Reserve are cleared much faster, you have full funds availability the next day.

Like iCore360, Proof21 is fully integrated, flexible and intuitive. Built on the same open and adaptive architecture used by iCore360 and DCI Teller, it has been tested with the leading check scanners on the market and assures the highest quality CAR/LAR image recognition and federal X9.37 specifications.

Core technology you can depend on . . . a relationship you can trust.

Only DCI offers complete Proof21 item capture and proof, automated BSA compliance, and tools for foolproof check fraud prevention and identification verification – all directly from your teller line. We also provide comprehensive remote merchant capture solutions.

#### Features

- Intuitive teller workflow and document handling
- Accurate and Fast Check Capture
- Automatic creation of virtual tickets and documents
- Integrated fraud detection
- Electronic delivery of balanced images and data
- Fully integrated with iCore360® and DCI Teller
- Variety of file formats
- Accurate CAR/LAR engine and certified scanners
- Fully compliant with X9.37 specification
- Thin client capability (Citrix, VDI, TS)

#### Benefits

- Reduce teller keystrokes and data entry
- Reduce item handling and touchpoints
- Improve transaction accuracy
- Eliminate paper costs with virtual tickets/items
- Electronic signatures
- Accelerate clearing and funds availability
- Time and cost-savings in proof operations
- Eliminate courier services
- More efficient scheduling and increased production windows
- Improve customer service
- Deploy to other departments (Lockbox, Loans, Etc.)
- Clear all branch work same day
- Transmit to DCI throughout the day

**Let us show you how to reap more benefits at the teller line with Proof21.**

## Award-winning Solutions and Service

### **iCore360 Intuitive Core** *featuring:*

- Web-Driven Simplicity / Integration
- Single Source Open Data / Full Security
- Analytics / Custom Reporting / GL Dashboard
- Entire Customer Relationship Control
- Account Origination / Advanced Lending
- Custom User Workflows
- Document Imaging
- Profitability / ALM

### **iCoreGO Digital Suite** *featuring:*
